

Addendum Vigil® Cuatro User's Manual

Expected lifetime of batteries installed starting October 2018 has changed. Please replace paragraphs 5.2, 7.1 and 8.3 in this manual by the new paragraphs in this addendum.

5.2 Dual Battery Pack

NATO Stock Number (NSN) 6130-13-119-7106

The battery pack is composed of 2 metal lithium AA cells in the lower half of the case. It is not subject to any memory effect and is extremely long lasting. The battery pack works at a temperature range from -13°F to +158°F or from -25°C to +70°C. The use of low consumption components in conjunction with a sophisticated power management program has significantly improved the battery's life span.

The battery's life span is expected to be a minimum of 5 years, or 2000 jumps.

The battery in new **Vigil®** units which are installed starting October 2018 must be replaced (mandatory) between 8 and at latest 12 years after "DOM Vigil".

Vigil units produced since October 2018 have a « Bat Rpl before : XX » , date on the label at the back side of the **Vigil®**.

Vigil® units with a « DOM Vigil » before October 2018 which do not have a « Bat Repl before : XX » (date on the label at the back of the Vigil) need to have their battery replaced (mandatory) latest 10 years after « DOM Vigil ».

→ *To replace the battery, the complete Vigil® unit needs to be send back to A.A.D. nv/sa Belgium, or VigilAmerica.*

7.1 Replacing the Battery Pack

VIGIL®Cuatro Dual Battery Pack, can only be replaced by A.A.D nv/sa Belgium or Vigil America. Therefore the **VIGIL® Cuatro** has to be returned for a battery replace. (see § 7.4)

8.3 Operating description

Power Pack: 3.6V dual lithium **Vigil®** AA battery Life time min 2000 jumps or 5 years.
